VESTIGO
CARDS & PAYMENTS

Vestigo *Issuing* on IBM LinuxONE

Learn more about Vestigo

Vestigo *Issuing* is a transformative card management system which runs in perfect synergy with IBM LinuxONE

Vestigo *Issuing* is a next-generation, API-first, customer-centric, configurable card management system, which supports all types of cards, credit, debit, prepaid and commercial, BNPL (buy now and pay later), and cash loans. The solution is used by multi-national banks, B2B2C specialists, and third-party card processors. Vestigo currently supports clients in 7 European countries with a strong growth strategy into further markets. Vestigo *Issuing* now runs on IBM LinuxONE. Key features of the joint solution include:

Faster time-to-market, future-proof and resilient
The Vestigo *Issuing* solution offers a highly configurable system with parametrized features that do not require coding, allowing for faster time to market. Part of a broader customer-centric solution that addresses convergence across card and account payments, the solution allows the addition of account-to-account payments within the same solution.
Vestigo Issuing solution running on Red Hat® OpenShift® Container Platform (OCP) and IBM LinuxONE ensures a future-proof application environment with high performance, scalability, high availability, and a compelling TCO. IBM LinuxONE is designed to deliver superior resiliency with a service-level agreement of 99.999% availability[1].

Growth and innovation partnerships
Partner management module automates cooperation with distribution partners. API-first architecture with 200+ APIs enables cooperation with product partners and fintechs. Red Hat OpenShift supports modern, hybrid-cloud application development and allows teams to consistently develop, deploy, and orchestrate cloud-native applications, while taking advantage of the security, reliability, and scalability of IBM LinuxONE infrastructure.

Know more about IBM LinuxONE

Key use cases & highlights

Card modernizing solution
With a proven track-record in complex migrations, Vestigo can help modernize to an API-first and future-proof system.

Driving card business growth
Multi-everything system with strong time-to-market, easy geographic expansion and enabling distribution and innovation partnerships.

Customer-centric functionalities
Ideal first step towards payments convergence: BNPL, loyalty, etc. across cards and account-to-account payments

What our customers are saying
"Partnering with a trusted partner like Vestigo helps us modernize and consolidate our pan-European card business, which is the key step of our strategy to transform into an agile bank delighting our clients and partners with best-in-class products and services"
– Ing. Vittorio Cornaro, Chief Executive Officer, Cornèr Bank Group
